description	business_meaning_or_relationship
Unique supplier identifier	Primary key
Name of the supplier	Supplier business name
Supplier city	Supplier location
Supplier country	Supplier location
Type of goods or service supplied	Supplier category
Supplier contact email	Contact information
Supplier rating	Performance rating
Unique product identifier	Primary key
Name of the product	Product description
Product category	Product classification
Selling price per unit	Used to calculate order value
Cost per unit	Used to calculate purchase or inventory cost
Stock level at which replenishment is needed	Inventory control threshold
Unique warehouse identifier	Primary key
Name of the warehouse	Warehouse description
Warehouse city	Warehouse location
Maximum storage capacity in units	Used for warehouse utilization
Unique inventory record identifier	Primary key
Product stored in the warehouse	Foreign key to products.product_id
Warehouse holding the product	Foreign key to warehouses.warehouse_id
Physical quantity currently in stock	Current stock
Quantity reserved for orders	Reserved stock
Minimum buffer stock	Used for stock risk analysis
Unique purchase order identifier	Primary key
Supplier for the purchase	Foreign key to suppliers.supplier_id
Purchased product	Foreign key to products.product_id
Receiving warehouse	Foreign key to warehouses.warehouse_id
Date purchase order was recorded	Procurement date
Units ordered from supplier	Purchase quantity
Cost per purchased unit	Used to calculate purchase_value
Current purchase order status	Pending, In Transit or Received
Unique customer order identifier	Primary key
Date customer order was placed	Order date
Product requested by customer	Foreign key to products.product_id
Number of units ordered	Used to calculate order value
Customer destination city	Delivery destination
Current order status	Processing, Shipped or Delivered
Unique stock movement identifier	Primary key
Date stock movement occurred	Movement date
Product affected by movement	Foreign key to products.product_id
Warehouse where movement occurred	Foreign key to warehouses.warehouse_id
Reason for stock movement	Purchase Receipt or Order Dispatch
Units added or removed; negative means stock reduction	Stock movement amount
Related purchase or customer order identifier	Links to purchase_id or order_id
Unique shipment identifier	Primary key
Customer order being shipped	Foreign key to orders.order_id

Date shipment was dispatched	Shipping date
Expected date of delivery	Planned delivery date
Transport company handling shipment	Carrier name
Cost of transporting the shipment	Logistics cost
Current shipment status	Delivered or In Transit
Unique delivery record identifier	Primary key
Shipment associated with delivery	Foreign key to shipments.shipment_id
Expected delivery date	Planned delivery date
Actual date delivery was completed; blank if pending	Used to calculate delivery delay
Delivery completion status	Delivered or Pending
